PROFESSIONAL SUMMARY

Automotive Manufacturing Engineer and Project Manager with 12+ years of experience in Body-in-White (BIW) process planning, robotic simulation, manufacturing engineering, production launch support, and cross-functional leadership. Proven track record of process optimization, continuous improvement, stakeholder management, and risk assessment on automotive manufacturing programs for premium OEMs including Jaguar Land Rover, Mercedes-Benz, and Volkswagen.

CORE SKILLS

Body-in-White (BIW) Manufacturing • Manufacturing Process Engineering • BIW Process Planning • Production Launch Support • Continuous Improvement • Cross-Functional Leadership • Automotive Manufacturing • Robotic Simulation • Tooling & Fixture Development • Change Management • Process Validation • Risk Assessment • Stakeholder Management • Lean Manufacturing • Root Cause Analysis • Manufacturing Quality Systems • Process Optimization • Project Management (PMP)

PROFESSIONAL EXPERIENCE

Project Manager – Automotive

HLS GmbH — Augsburg, Bavaria, Germany | January 2023 – Present

- Led 4+ automotive manufacturing and BIW (Body-in-White) projects for premium OEMs — Jaguar Land Rover, Mercedes-Benz, and Volkswagen — managing delivery from concept development through production validation, launch support, and manufacturing readiness.
- Coordinated cross-functional engineering, manufacturing, quality, and supplier teams to hit project milestones, drive process improvements, and meet production objectives, including regular review meetings and presentation of complex simulation and tooling designs at design buy-off phases.
- Managed multiple concurrent projects against tight deadlines and constrained resources, prioritizing scope and timelines across cross-functional departments to keep programs on track.
- Supported manufacturing process development, change management, and continuous improvement initiatives across BIW production environments.
- Applied structured problem-solving methodologies (e.g., root cause analysis) and risk management practices to identify and resolve manufacturing and process-related issues.

Team Lead – Automotive Simulation & Process Design

Sacha Engineering — Bangalore, India | June 2014 – December 2022

- Led a team of BIW process planning and robotic simulation engineers, ensuring on-time delivery of manufacturing process designs, tooling concepts, and production requirements.
- Guided engineers on BIW manufacturing process development, production feasibility analysis, and continuous improvement initiatives.
- Managed project execution, resource allocation, and engineering deliverables across multiple automotive manufacturing programs.
- Performed manufacturing process optimization, root cause analysis, and process validation activities to improve quality, efficiency, and production performance.
- Developed and validated BIW manufacturing process concepts, robotic simulation studies, and production layouts for automotive body shop projects.
- Collaborated with tooling, manufacturing, and quality teams to support process capability, dimensional quality requirements, and production launch activities.
- Supported equipment procurement reviews, tooling validation, and manufacturing process implementation for automotive production programs.

EDUCATION

Bachelor of Engineering – Mechanical

BVB College of Engineering — August 2013

CERTIFICATIONS & LANGUAGES

Project Management Professional (PMP) | Deutsch B1 – Completed (B2 in progress)

English — Fluent | German (Deutsch) — B1–B2, Conversational
